### SPACE-AGE FURNITURE

Droids, satellites and stars form the reference points for Antonio Arico's Galactica collection of outdoor furniture. The range consists of 10 different pieces of aluminium furniture that pay tribute to Irish architect Eileen Grey. Each piece represents disproportionate symmetry, primitive volumes and graphic edges, while also possessing empathy, character and a strong personality. Based on Arico's preferred colour palette, this set of products is his version of the possible furniture scenarios over the next decade.
